ART UNIT 322

Art Unit: 3722

1. The following is an examiner's statement of reasons for allowance: Andreasson '837 is the closest art of record. Note projections 34 and 36 which mate with surface 103. In order for this to happen, the cutting portion 24 and shank portion 20 must rotate relative to each other by what appears to be a 10 degree angle of rotation (see from figure 3). This hardly constitutes the bayonet coupling as set forth in claims 1, 11, 13, and 15 as if such a coupling were to be used, the cutting part would fly off the shank and become a projectile whenever the rotation of the bit was slowed down. Note from column 2, lines 51+ that the two parts are actually coupled together by brazing, not by a bayonet connection. There is no suggestion to provide a bayonet connection between the cutting portion and shank.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dan Howell whose telephone number is (703) 308-1728.
